## START GUIDE

Express your potential

THANK YOU  
for joining Voltaire Design team

« **Service, customization** and **personalization** are at the heart of this creative process and can continuously be expected, as you are now a part of the Voltaire Design Team of riders.

**Technology, innovation** and **design** now make you and your mount a powerful and inspiring duo for all generations of riders. »

Our **mission** is to offer you **high-performance** and **innovative** equipment using the latest **technologies** to enable you to maximize your **potential**.

**Listening, personalization** and the choice of quality materials make it possible to create a **unique** equipment **adapted** to each horse/rider duo so that they can express their full potential.

Team Voltaire Design

## MAINTENANCE

Before delivery, we have taken care to prepare and inspect all your equipment. It is already ready for use. All you have to do is appreciate the quality of your new equipment.

First step: cleaning the saddle.

After each use, we recommend using glycerin soap with a moistened sponge. This will remove the dirt accumulated during your session, moisturize and protect the leather continuously.

Second step: greasing the saddle.

When your saddle needs it\*, with a sponge or hands, we recommend using the balm on dry and clean leather.

Do not use too much balm, as this may stain your pants or make your saddle slippery.

*\*How do I know if my saddle needs to be greased?*

*Gently run your finger over your saddle. If you feel a slight stickiness on your fingertip, it means that your leather is sufficiently nourished. Otherwise, we recommend to grease with the Balm provided*

- ☞ Contact areas subject to friction must be treated.
- ☞ Do not oil calf or buffalo leather.
- ☞ Do not grease, oil or soap a wet saddle.
- ☞ Do not leave your saddle:
  - in front of an area of intense heat
  - in a car or a damp place for extended periods of time
- ☞ It is advisable to leave your equipment in a dry place at room temperature

## OUR COMMITMENT 1 SADDLE = 1 TREE

With a Voltaire Design saddle, you contribute to a project much bigger than the one of making a unique saddle....

In 2010 we became involved in the campaign launched by the UN Plant for the Planet.. In partnership with the association

Emergency Planet, we plant a tree for each saddle sold. In this way, we contribute to the restoration and the protection of threatened ecosystems and their populations.
